1.) Place the mounting plate in position.
2.) Fix the mounting plate with two screws with a maximal screw head heigt of 2.8mm. (e.g. M3 cross-head screws, M3 hexalobular screws or ST3.5 tapping screws etc.)
3.) Clip the camera onto the mounting plate

4.) Connect the cable

$\emptyset 3.6$

$\emptyset 3.6$

40

Spacing for
screw head: 2.8

To remove the camera, take a slotted screw driver
for example (size 1 or bigger) and place the tip
between the two aluminium plates.
Just turn the screwdriver or lever the camera away
from the mounting plate.
