

## Declaration of Compliance – PFAS

To whom it may concern:

### Manufacturer Declaration of Conformity - PFAS (Per- and polyfluoroalkyl substances)

Per- and polyfluorinated alkyl substances (hereafter abbreviated as PFAS) are a group of extremely persistent chemicals that are used in many consumer products. PFAS are used in products because they can, for example, increase oil and water repellency or withstand high temperatures. There are thousands of different PFAS on the market. As these substances are persistent chemicals, they accumulate in humans and the environment.

ESPROS Photonics has every intention to contribute to the continuing process for obtaining a cleaner and healthier environment. We are continuously improving our products and processes.

Some PFAS are already subject to (non-exhaustive list):

- Regulation (EC) No 1907/2006 (REACH)
- Toxic Substance Control Act (TSCA), Section 6 (h)

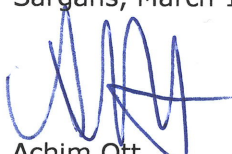

We declare that our products comply with the current legal requirements of REACH and TSCA.

Based on current up-to-date information received in good faith from our suppliers, we confirm that all products supplied by ESPROS Photonics AG do not contain per- and polyfluoroalkyl substances (PFAS).

The information contained in this statement is based on our knowledge and belief as of the date of this statement. We base our knowledge and belief on information provided to us by third parties (suppliers of raw materials and components) and make no representations or warranties as to its accuracy and assume no liability for the consequences of its use. We have taken and will continue to take reasonable steps to provide representative and accurate information. This document will be updated when the requirements or information change in a way altering the content of this statement.
