

TOF>frame 611

Miniaturized 3D TOF camera

FEATURES

- ✓ 8x8 Pixel
- ✓ 0.1 - 2m range
- ✓ FOV 12° hor/ver
- ✓ >50fps
- ✓ Light weight 3.7g only
- ✓ Low cost
- ✓ Low power consumption
- ✓ Sunlight tolerant
- ✓ Easy to use
- ✓ Customized versions possible

FUNCTIONAL DESCRIPTION

The TOF>frame 611 is a miniaturized and cost optimized 3D TOF camera. It is based on the ESPROS proprietary time-of-flight technology using the epc611 TOF chip and a small LED to illuminate the scenery. The camera controls the illumination and the imager chip to obtain distance and confidence images. Due to the high performance of the imager chip with its unique ambient light suppression, the camera can be used in outdoor applications at full sunlight. This allows a wide variety of new applications, e.g. for mobile robotics. This very small module is easy to use because it delivers fully calibrated and compensated 3D images. All the complex engineering and time consuming design tasks regarding optics, illumination and signal processing are already solved.

APPLICATIONS

Gesture Recognition

In-cabin Monitoring

Humanoid and Household Robots

Doors and Gates

People Counting

Industrial Automated Guided Vehicles

SPECIFICATIONS

Range
0.1 - 2m

Power Consumption
5V, 80mA

Ambient-light
100kLux

Resolution
8x8 Pixel

Interface
UART 1MBit/s

Temperature Range
-20 - +85°C

Accuracy
±4cm

Data Output
Resolution 0.1mm
4 Bytes per Pixel
ROS driver upon request

Field of View
12° hor/ver

MECHANICAL DIMENSIONS

© 2019 ESPROS Photonics Corporation
Characteristics subject to change without notice
